ABOUT THE CONGRESS

On October 8-9, 2019, the FT2019 Congress 'Sustainable Aerospace Innovation in a Globalised World', will be held as a forum for presenting and exchanging information in the broad fields of aerospace. Invited keynote speakers will frame the Congress on presenting their insights into current research and industry political topics.

Moreover, the Congress will be a unique meeting place in Sweden for networking and socialising with colleagues and officials from industry, institutions, academia and associations.

The Congress also offers an exhibition area where delegates can meet exhibiting companies and organisations between sessions. Please contact ft2019@meetagain.se if you are interested in exhibiting your company or organisation in making the exhibition an interesting feature of the Congress.

The Congress is organised for the 10th time by the Swedish Society of Aeronautics and Astronautics (FTF) and for the third time in cooperation with the Strategic Innovation Programme for Aeronautics (Innovair). More than 200 presentations are expected at the Congress.

MAJOR CONGRESS TOPICS

- Innovative future Air and Space systems and technologies
- Innovations supporting sustainable business models in space
- Collaborative engineering and research
- Air Traffic Management (ATM) and flight operation systems
- Research and technology for Air Power
- Clean Space
