THE CHALLENGE

How do we keep the Swedish Air Force operationally relevant over time?

SWAP MAIN OBJECTIVES

Three main goals:

- Generate knowledge for the political process regarding Future Combat Air procurement strategy.
- Reduce risks connected to the decision regarding Future Combat Air procurement strategy.
- Maintain freedom of action for the three strategies

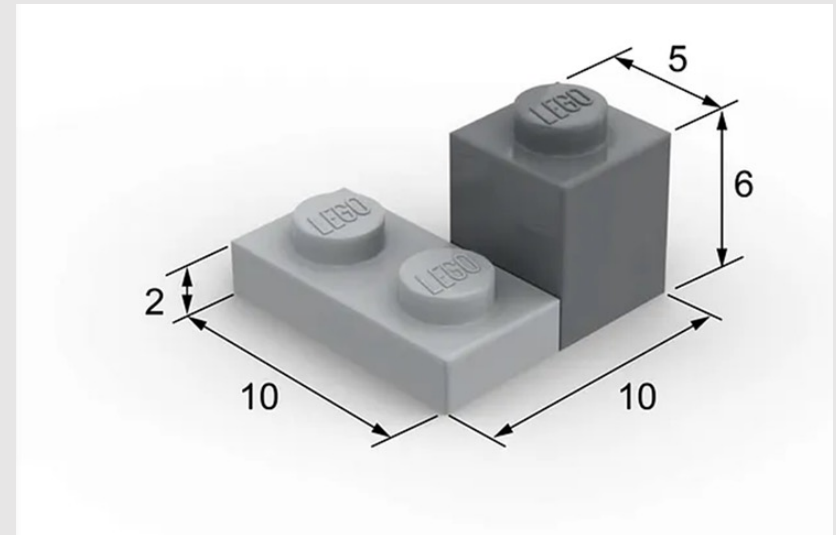

Principle procurement options

- National development programs
- Development through international cooperation
- International acquisition

METHODOLOGY

The three overall goals will be achieved through:

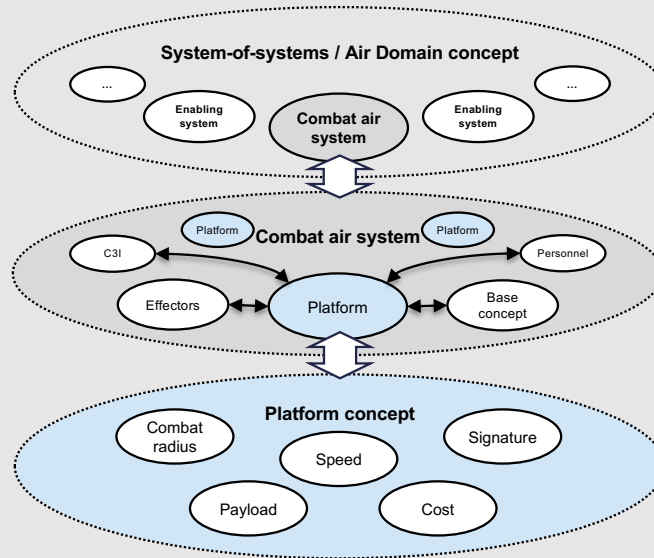

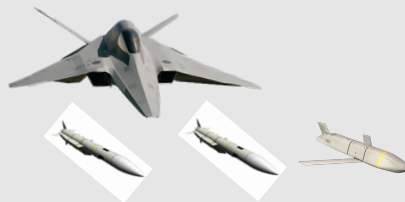

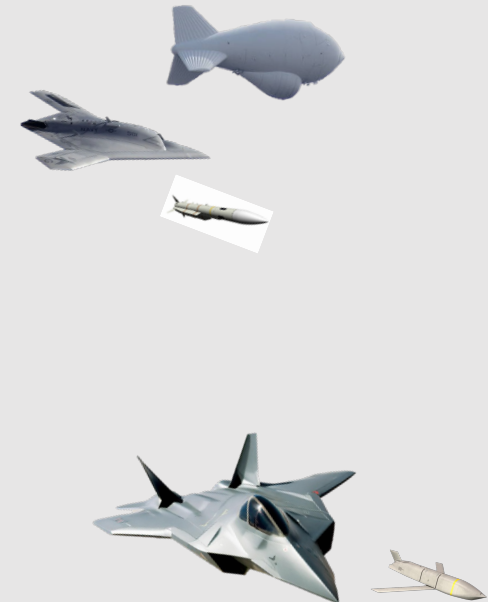

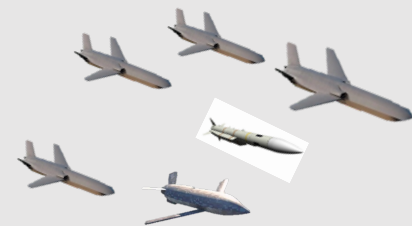

- Concept development
- Technology development
- Demonstrators
- Supported by
 - Exploration of possibilities for cooperation
 - Theoretical analysis of commercial, industrial and other supporting dependencies

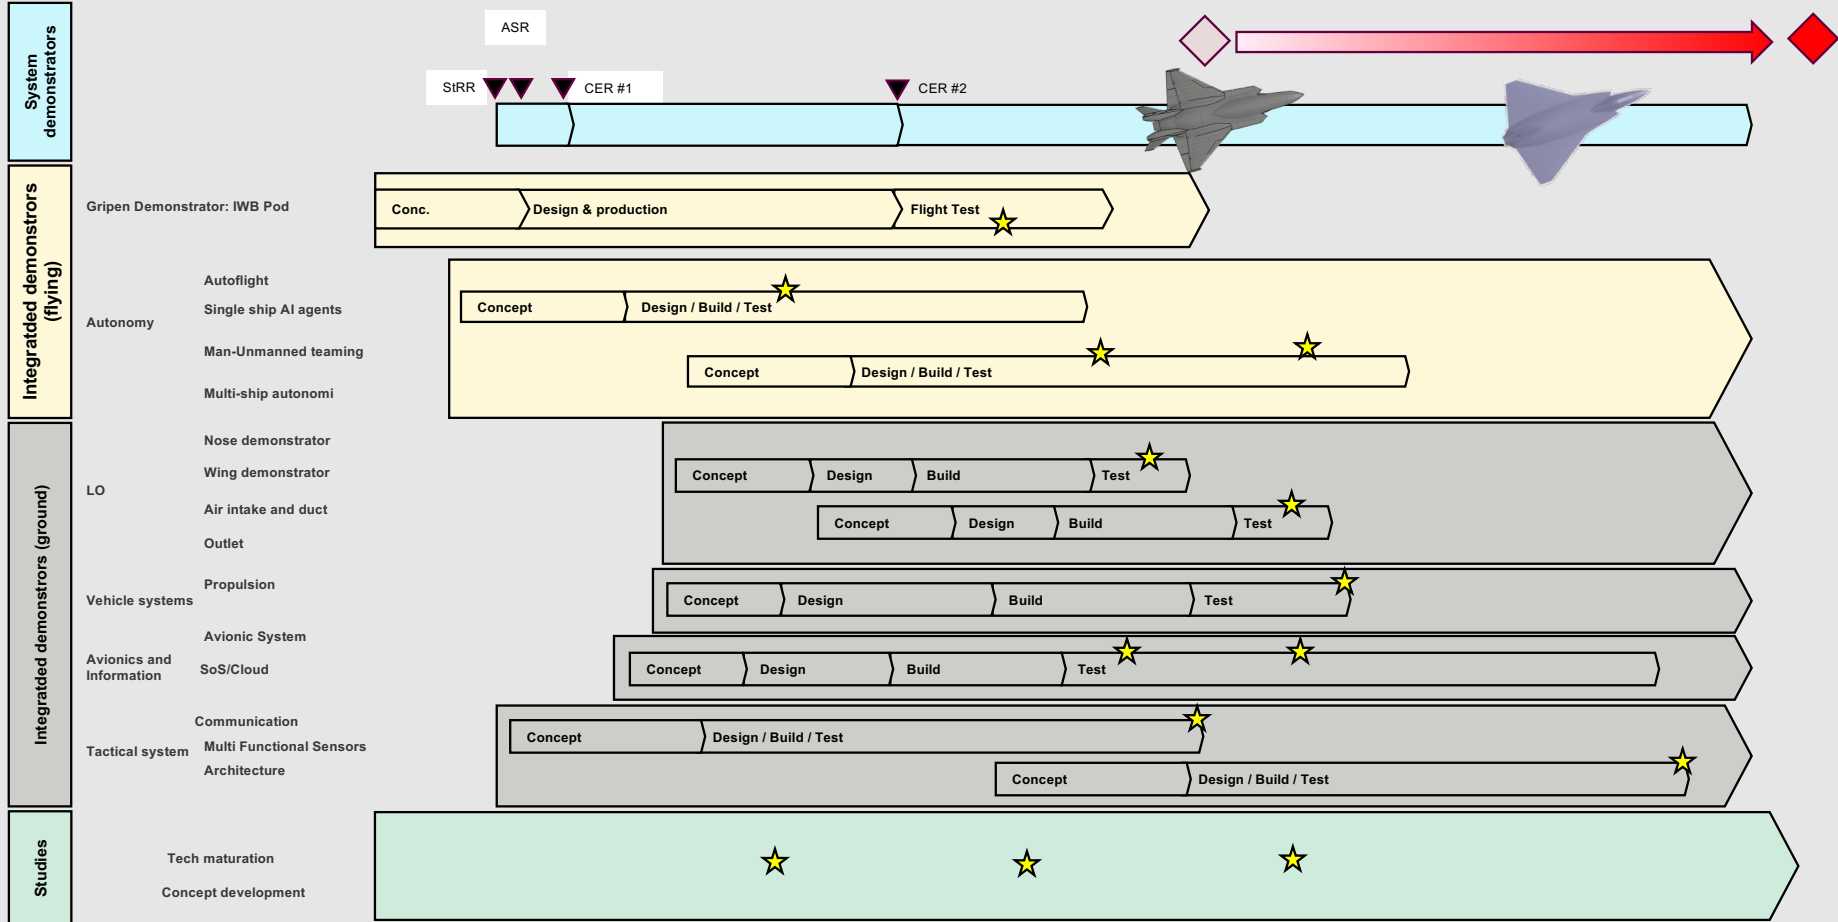

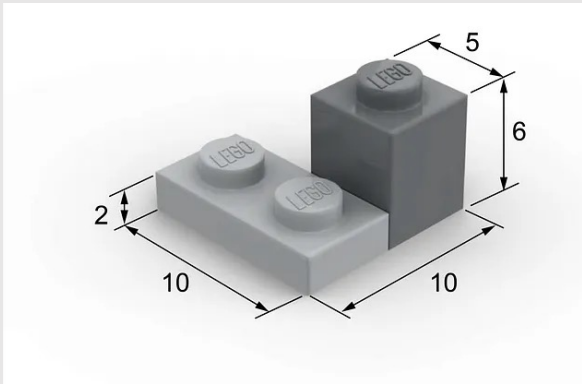

FMV has been tasked to identify other relevant opportunities that may arise during the course of SWAP

FMV has also been tasked to evaluate how to increase near-term operational effect and what might be achievable with an increased ambition level within SWAP.
